

Systems Fail

Cold

Is the devil on the way
Did the ghost in the machine close our minds
Did the angels seem betrayed
When the politics of truth seem blind
We don't have to play this game
We won't fall in line

All of our systems fail
All of our systems fail
All of our systems fail
All of our systems fail

If the sun refuse to shine
Will the grid be made to save our lives
We won't stand and hail the king
When the politics of truth seem blind

We don't have to play this game
We won't fall in line

All of our systems fail
All of our systems fail
All of our systems fail
All of our systems fail

All of our systems fail
All of our systems fail
All of our systems fail
All of our systems fail

What the world needs now's a sign
What the world needs now's a lie
What the world needs now's a sign
