

What Happens Now

Cold

Does the bite still sting
Did it make you feel the world
Did the venom enter your heart
Like a love on the way
Was a killer inside your head
Did your memories often fade
Is it hard to breathe
Did we make you this way

What happens now?
Need a hero to save the day
Pick us up and just fly away
What happens now?
Need a hero to save the day,
Now he's on the way

Did it freak you out?
Could you feel it in your veins
When the venom enters your heart
Do the stars shine the same?
Did you think you could save the world?
Are you far, far away?
Is there someone made for you
Did we take her away?

What happens now?
Need a hero to save the day
Pick us up and just fly away
What happens now?
Need a hero to save the day,
Now he's on the way

What happens now?
Need a hero to save the day
Pick us up and just fly away
What happens now?
Need a hero to save the day,
Now he's on the way
