

Aftermath

coldrain

Just take the memories
Leave me a tragedy
I'll write you a song
Maybe then you'll finally see
It's all you gave to me

Day by day by day
It's like we're in a war nobody wins
I'll say what I want to say
I know you won't listen anyway
My words don't even hit you
So why is it you act so hurt now
You can go and play the casualty
When you're with your friends
But don't you forget
You just went and made me the enemy
It was hell for me straight to the end

Just take the memories
Leave me a tragedy
I'll write you a song
Maybe then you'll finally see
It's all you gave to me

Day by day by day
It's like you always thought this was a game
Play if you wanna play
But I don't wanna stay
So don't you forget
You just made me the enemy
It was hell for me straight to the end
We were doomed from the start now it ends

Just take the memories
Leave me a tragedy
I'll write you a song
Maybe then you'll finally see
When you hear this melody
I hope we can both agree
It wasn't meant be
Every night I'll wish you hell
Singing my farewell

This is all you get from me
This is all you get from me
Save your breath I don't care anymore
Save your breath I don't care anymore
It was hell for me straight to the end
Straight to the end, Straight to the end
We were doomed from the start now it ends

Just take the memories
Leave me a tragedy
I'll write you a song
Maybe then you'll finally see
When you hear this melody
I hope we can both agree

It wasn't meant to be
Every night I'll wish you hell
Singing my farewell
