

# Roll With The Punches

Colony House

We walk through the fire, day after day  
Search for the answers, fight for a way  
But when it makes no sense inside our heads  
Our hearts start playing games

So say what you need to, bear what you must  
Love's meant to mend these fragments of trust  
So with steady hands and steady hearts  
We can fix what's fell apart

Roll with the punches, fight through the fire  
When the trouble comes, baby  
We can work our way around it  
Love is a lesson to be learned with time  
If we can't climb a mountain  
Then we can work our way around it  
(Together)  
We can work our way around it

How can we carry on?  
How can we grow?  
When this road we've traveled on  
Is swallowed by the storm  
And when the battle's breaking down your door  
We've got to

Roll with the punches, fight through the fire  
When the trouble comes, baby  
We can work our way around it  
Love is a lesson to be learned with time  
If we can't climb a mountain  
Then we can work our way around it  
(Together)  
We can work our way around it

Every battle, every storm  
Every shattered dream of ours  
All the sorrows that we won  
All the pain abounding  
All the broken hearts  
Has brought us  
(Together)  
(Has brought us)  
(Together)

Hey!  
Roll with the punches, fight through the fire  
When the trouble comes, baby  
We can work our way around it  
Love is a lesson to be learned with time  
If we can't climb a mountain  
Then we can work our way around it  
(Together)  
We can work our way around it
