

## Pride And The Pain

Condemned 84

If you can keep a pride in yourself  
There's a chance they'll pick on you  
One too many beers, mouthed right off  
That comes naturally to you  
You think you're among friends but they all fucked off  
They've seen whats been coming your way  
They won't tell you they've seen the light  
They won't help you on the way

For you're pride you'll take the pain  
You'll make a stand won't play their game  
(x 2)

All the backstabbers you can do without  
You don't need them to fuck with you  
Got all your own ideas and beliefs  
The media will try to discourage you  
Don't mess with the best you say to them  
You won't listen to all their lies  
Stand up for what you think is right  
Then you'll be the one that they despise

All the time kicked around in their games  
Just another one with fucked up brains  
We'll carry on they won't stop us no way  
We won't play the games they want us to play
