

## You and Love and I

Connie Smith

I wish I could unlock the door that leads to yesterday  
Back to when our love was young and we had things our way  
I'll never love that much again if I live a hundred times  
Back when there was you and love and I  
You and love and I  
I could never find another one to take your place  
All the love in this old world could never fill the space  
I'll spend my forevers dreaming of those tender times  
Back when there was you and love and I  
You and love and I  
Sometimes I still find myself making plans for two  
Then I realize how many things I didn't do  
There's a million things I'd change if I just had the time  
Back when there was you and love and I  
You and love and I  
I could never find another one to take your place  
I wish I could unlock the door that leads to yesterday
