

# Lonely Town

Conway Twitty

She gave into him last night  
She thought he was Mr. Right  
But he left like all the others  
Before the morning came around  
Same old story in lonely town

The sun comes up, the heart goes down  
She's tried everything she knows  
Come so far and yet so close  
She keeps searching for the magic  
But it's nowhere to be found  
But that's how it is in lonely town

The sun comes up, the heart goes down  
There's got to be a way out  
Someday she'll find it, she won't always be alone  
The one she's been waitin' for  
Will turn her life around and take her away  
From this lonely town

The sun comes up, the heart goes down  
There's got to be a way out  
Someday she'll find it, she won't always be alone  
The one she's been waitin' for  
Will turn her life around and take her away  
From this lonely town

Where the sun comes up, the heart goes down  
No more living in this lonely town
