Better Part of Me

Course Of Nature

Something says to me don't be afraid But if I don't worry I'll surely slip away I need to speak to you, hear what you say But if I breathe too hard I think I'll go insane There's a part of me so insecure Of all that I could have and all that I've gone through If there could be a way through a better design I'd probably screw it up and let it slip away Well I wonder if I stayed here would you become a better part o f me I can say now that you changed me and I've become a better part of me I am the strongest I have ever been The very thought of you can't even comprehend The safest bet for me is to focus hard And try to face myself I can't take it anymore I hope I'm everything That I need to be

That I need to be You are my everything So I'll just stay
