

Caught in the Sun

Course Of Nature

You're my distanced destination of choice
I'd give anything just to hear your voice
I couldn't pass you on the street
Without saying a word
Most times I missed the voice
That goes unheard

What if I missed you
You got caught in the sun
What if I did something
Never to be enough

People everywhere how could I be sure
Is it you that I have been looking for
What would it take for me to be comfortable
With you, with me you're the chosen one

What if I missed you
You got caught in the sun
What if I did something
Never to be enough

You are there for me this I hope and pray
You will wait for me, I won't be too late

What if I missed you
You got caught in the sun
What if I did something
Never to be enough

Will you wait for me
Or will I be too late this time
You are there for me this I hope and pray
