How Can I Live Without You

You can still come and bring me coffee in the morning You can still come and make me chicken fried steak Or you can live your life with whomever you please to As long as someone takes good care of me You know I don't mind

How can I live without you If it means I gotta get a job How can I live without you If it means I gotta get a job

You can still come and bring me those fancy pastries You can still come and crawl into my bed You can live your life with whomever you please to As long as someone takes good care of me You know I don't mind

How can I live without you If it means I gotta get a job How can I live without you If it means I gotta get a job

Yeah!

How can I live without you If it means I gotta get a job How can I live without you If it means I gotta get a job

(How can) How can I live without you
If it means I gotta get a job
(How can) How can I live without you
If it means I gotta get a job

Cracker
