

Vermillion Gold

Crossfaith

Here we go!
We are melting inside and we're burning (burning)
Yeah we're burning together
This light's invading on our souls
While we are spreading out the gold at the speed of light

Let go!
We're born in resonance
Let go!
Shine like a thousand suns
Let go!
Burn up inside of me
Let go!
We'll never stop till we're falling to pieces

I become the world when I breed without a soul
'Till the end of all we melt in red and gold
But we're burning stronger

Let's go!
We are melting inside and we're burning (burning)
Yeah we're burning together
My soul is floating up in the air
And it's spreading color red at the speed of light
Go!

Let go!
Burn up inside of me
Let go!
Shine like a thousand suns

I become the world when I breed without a soul
'Till the end of all we melt in red and gold
But we're burning stronger
