Only Human

Crown Of Glory

How do you do this morning? How does it feel to face the news? Cheating, lies and corruption Look there is real blood on the screen

Raise your voice you will be heard Their time is up our time will come Wise men said good things take time Rome wasn't built within a day

So raise your voice

Let's stand up for the things we believe in Don't just raise a white flag and give up Never said that I had all the answers, But if we change ourselves, we could change...

... Everything

I don't think there is any leader It's more like the blind leading the blind We don't need your confessions Or any other lame excuse Always grub first than ethics All your regrets aren't worth a dime False promises from their lips Just empty words for desperate ears
