

Can never give you back what you try to feed  
Whatever you do you cannot give me what I need  
It's in my blood - it's in my brain  
A virus a deafening creed

Bless my blood - to heal my intoxication antidote  
Bless my blood - help me to find my salvation

I need you - I want you - you are my antidote  
I ain't looking for a cure any longer

Be seeing you - it won't be so  
The both of us are sure to know  
With hearty words people lie  
Ignore the pride and don't ask why  
You're never gonna see - you're not sane  
All you're gonna hear is my silent cry

Bless my blood - to heal my intoxication antidote  
Bless my blood - help me to find my salvation

I need you - I want you - you are my antidote  
I ain't looking for a cure any longer  
I need you - I want you - you are my antidote  
But why is the poison stronger

I need you - I want you - you are my antidote  
But why is the poison stronger

I need you - I want you - you are my antidote  
I ain't looking for a cure any longer  
I need you - I want you - you are my antidote  
So will the poison still be stronger
