

Make a Dream Come True

Crystal Gayle

If I try as hard as I can
Maybe I can paint you again
In my mind, the way you were when you used to love me
Before you learned to think you were above me

If I dream the same every night
And every dream, finds me holding you tight
And you're glowing, just knowing that our love is good as new
Then maybe I can make a dream come true

If I wish on every star that shines
And if I wish the same wish every time
If I pray to all the Gods that be maybe then
Can find a way to bring you back to me

And if I dream the same every night
And every dream, finds me holding you tight
And you're glowing, just knowing that our love is good as new
Then maybe I can make a dream come true
