

True Love

Crystal Gayle

Hear that song
Playin' on the radio
A little flash from the past
Faded out long ago
Talkin' bout
"Woncha be my Romeo
And I'll be your Juliet"
Well I don't believe
It can be that easy
You know I haven't seen it yet

True love
Everybody's lookin' for a
True love
Seems so hard to find
True love
Always just a heartache away

So hold me tight
Tell me what I want to hear
You know, those pretty lies
You love to whisper in my ear
Just like a million other lonely hearts
Playin' out the same old scene
'Cause tonight's the night, it can turn out right
Like the movies and the magazines

True love
Everybody's lookin' for a
True love
Seems so hard to find
True love
Always just a heartache away

Every night I hope and pray
A true lover will come my way
I can't waste it anymore
How long can I hold out for

True love
Everybody's lookin' for a
True love
Seems so hard to find
True love
Always just a heartache away

True love
Always just a heartache away

True love
Always just a heartache away

True love
Always just a heartache away

True love
Always just a heartache away
