Keep Your Head Up

Outside in your [?] I take my chances there I am glad to see what's there I am glad to see what's there How bout we take a trip and start in on our love affair How about I take you to Japan I'd be glad to see you there I'd be glad to see you there

But don't you expect me to share my love with you Oh oh no

Gotta keep your heads up Gotta keep your feet down We don't want love At least not from that crowd

How about we make a quick memory out of this [?] I'd be glad to be in there I'd be glad to be in there It's not an evil trick you know that I don't [?] I'm not the kind to bring you there We can never see what's there We can never see what's there
