

Star

Curve

Don't want to get hurt I've been hurt enough I'm afraid of my shadow I'm afraid of love Don't want to get sunk Cos I've been hit before I'm afraid of my bed Cos I don't care for love

So tell me all you want to And I'll protect your virtue Give me rhyme or reason And I will show you treason

Now my star is out of reach Will I ever hit the peak Now I've failed all my friends Could anyone love me again?

Don't want to be tough I've been rough enough I'm asleep with myself When I rise above

All you've taken from me Are all the things you can't see You gave me rhyme and reason So I showed you treason

Now my star is out of reach Will I ever hit the peak Now I've failed all my friends Could anyone love me again?
