

(Verse 1: Cise Star)

Iced water over heat
The situation precarious
For whom the bell tolls
An Omen, here comes Damien
Watch for the steam it's hot like sun radiance
It bakes through the hate last days raise the gradient
Scorch through the summer its warm my God brother
Mercury is rising, wars killing each other
Can't handle heat need AC to sleep
When the power goes out my God I can't breathe
Hot like religious itching for war missions
In the name of God, "kill 'em" its all the diction
Crazy ridiculous blood shed the chrysalis
Using the good book to justify silliness

(Hook: Cise Star)

Stop stop
Read all about it
The world's getting hot my brother
So don't doubt it
Got out the kitchen but its hot in here too
Got out the kitchen but its hot in here too
Stop stop
Read all about it
The world's getting hot my brother
So don't doubt it
Got out the kitchen but its hot in here too
Got out the kitchen but its hot in here too
