

I am the hammerhead  
Sabrewolf tiger sitting in human form  
Writing cuneiform  
My hieroglyphics are lyrics born  
David Lynnnch mixed with Kubrick  
My style Picasso  
Michelangelo angles formed apostle  
A man on fire  
Sipping on warm water  
With a gin chaser  
Now it's your turn, but yet you falter, yes  
I breathe on Mars  
And walk through walls, defy  
Gravity's laws  
When I float beyond, my nigga  
The reason of us  
The metal will rust  
Gears break and bust  
Nothing is forever but dust, it is  
Leave me alone  
My anger is slow  
Burning like a smoldering flame  
Pain letting my know I'm

Cise (4x)

A devil dragon in this ice palace  
I write malice  
Sipping out of a chalice  
The hennessy jazz magic love  
Hypnotic, erotic  
A powerful drug  
Crip the wings with the beautiful slug  
Fall to earth, power  
The last king with the heavy brow  
My radiance surround sound  
Amplify me till I'm loud, scream  
These are a few of my favorite things  
Watch your back when I gangsta lean  
Get on my level nigga  
Dark shadows  
On the rhyme battle  
I see you grip that ice cross  
When I bear them fangs at you  
A pied piper and a vampire  
A werewolf at full moon  
Turn it out by the bonfire  
Say it again  
Original sin  
New rims on the 89 benz  
That shit is dope, boy  
Candy whips on Mandy's lips  
Put a diamond in a hershey kiss  
That shit is dope, boy

Cise (4x)

No need for long  
Cause sometimes I bleed in the song  
Holy water poured on the stigmata  
I'm gone  
Snake in the grass  
I see you, but I humbly laugh  
You try to bruise my heel  
But I slap away with my staff, believe  
Living life through a series of dreams  
Poetic words bust reality seams  
That shit is dope, boy  
Close your eyes for the sweet release  
Take my hand, honey  
Journey with me  
Follow me back, now  
Smoke and mirrors  
Voodoo and rhythm  
Come see where the sidewalk ends  
Open your eyes, slowly  
Scorpions talks  
And owls they watch  
Push your man on the corner with love  
Get on my level nigga
