

The Moment I Found You

Da Buzz

The moment I found you

The moment I found you

I was out on the street again
To a party, don't know the place
I was stucked in misery
I never thought I
I was alone
Couldn't feel all the tragedy
In this life of insanity
Now I know since I'm in your life
Just right, just right

The moment I found you

The moment I found you

Cannot stop what i feel inside
There's no way to break the spell
Only God knows what to do
When I'm with you, only with you
What's the game that you play with me
It's a lure to a mistery
Cause tonight we will make it far
Your love is alright, your love is alright

The moment i found you
It was only you and me
The moment i found you
I was falling on my knees
The moment i found you
It was only you and me
The moment i found you
I was falling on my knees

The moment I found you

The moment I found you
It was only you and me
The moment i found you
I was falling on my knees
The moment i found you
It was only you and me
The moment i found you
I was falling on my knees

The moment I found you
....

The moment I found you x6

....

The moment I found you

The moment i found you

I was falling on my knees
The moment i found you
