

## Jane

Dan Bern

So many things to think about  
And if I really tried  
Einstein's theory of relativity  
Could keep me occupied

But no matter what I do  
To keep great thoughts in my head  
Four little letters making up one word  
Keep spinning 'round instead

Jane Jane Jane  
Jane Jane Jane  
Your name reverberates through my brain  
Jane Jane Jane  
Jane Jane Jane

I bought a dictionary  
All it did was get in the way  
Too much ABCDEFGHI  
And not enough J

I wake up in the morning  
With your name on my lips  
I'm thinking of learning how to read in Braille  
To have you at my fingertips

Jane Jane Jane  
Jane Jane Jane  
Your name reverberates through my brain  
Jane Jane Jane  
Jane Jane Jane

Conversation isn't easy with such a one track mind  
If I thought about science like I think about you  
I'd win a Nobel Prize

I went to see a therapist  
The result was just the same  
We played word association  
And all I said was Jane

Yeah, there's much too much to think about  
Enough to make you go insane  
You can all think about everything else  
I'll think about Jane  
You can all think about everything else  
I'll think about Jane

Jane Jane Jane  
Jane Jane Jane  
Your name reverberates through my brain  
Jane Jane Jane  
Jane Jane Jane....
