

Notice Me

David Archuleta

I try to find the words when you walk by
But words just can't explain the way I feel, inside
My friends keep saying you're untouchable
And I can't help feeling invisible

I'd give anything to catch your eye
So you could see me in a different light
Tell me what's it gonna take, cuz I
Wish you would notice me
If you'd only give me just one chance
I could be the one, here I am
What's it gonna take to understand
I wish you would notice me
Notice, notice, notice me
You've got a light that never seems to fade
I'm drawn to you and I can't look away
We come from different places, girl I know
But two worlds colliding could be beautiful

I wonder if you know how amazing you are
You leave me breathless
You didn't even try but you stole my heart
And I don't want it back
