

Runaway

Dayshell

Something can tell me you're all that I need
Calmly remove all the blades that you see
I've been longing for your ecstasy
Find out what it really means to me
This is real that's for sure
This attrition is more than what I can take

Run away with me
I told you before, I'm in love and I mean it
Run away with me
I thank you so much for sticking around

Promise me baby, come closer to me
Hand over hearts, our fingers touching
I've been longing for your ecstasy
Find out what it really means to me
This is real that's for sure
Every second I'm with you I'm breathless

Run away with me
I told you before, I'm in love and I mean it
Run away with me
I thank you so much for sticking around
Won't you stand up, shout with whatever you've got
My tank is running empty with no one inside
Run away with me
I told you before, I'm in love and I mean it

You
You can try
I trust your best intent, same intent, be mine
You
You can try
I trust your best intent, same intent, be mine

Won't you stand up, shout with whatever you've got
Won't you stand up

Run away with me
I told you before, I'm in love and I mean it
Run away with me
I thank you so much for sticking around
Won't you stand up, shout with whatever you've got
My tank is running empty with no one inside
Run away with me
I told you before, I'm in love and I mean it

Won't you stand up, shout with whatever you've got

Won't you stand up
