Anywhere

When I'm lonely Deep inside A defending hand Takes me to a friend When I'm falling Asleep to dream Of a naked dawn Something keeps me warm

I feel better now That you are so close to me You make me high Anywhere I can taste the joy When I feel so close to you You make me high Anywhere

When I'm leaving That safe place Someone knows my way In the deepest grey And when I'm missing Your safe home I know I'm secure Everything's so pure

I feel better now That you are so close to me You make me high Anywhere I can taste the joy When I feel so close to you You make me high Anywhere **De/Vision**
