

Trade Places

Dead Letter Circus

I believe what I feel because the truth is too far away
Only when I can see the fall I know there's something to change
I believe what I feel because I choose the moment awake
But only in the reveal I know the truth I'm hoping to change

If you and I and them trade places
Make our stand in a generation
Let the truth decide
If we don't wait for this
It won't be long

Yeah if you and I and them trade places
Make our stand in a generation
Let the truth collide
If we keep faith in this
It won't be long

I can't be told I'm free
I've fallen awake
I can't be sold, I'm free
I've fallen awake

If you and I and them trade places
Make our stand in a generation
Let the youth decide
If we don't wait for this
It won't be long

Yeah if you and I and them trade places
Make our stand in generation
Let the truth collide
If we keep faith in this
It won't be long

I can't be told I'm free
I've fallen awake
I can't be sold, I'm free

I believe what I feel because the truth is too far away
Only when I can see the fall I know there's something to change
I believe what I feel because I choose the moment awake
But only in the reveal I know the truth I'm hoping to change

The break
The fall
The fear
The moment of faith
Becomes the heat that grows to a flame
You know
You see the rope or the chain
The wall
The breach
The hope you will gain

I believe what I feel because the truth is too far away
Only when I can see the fall I know there's something to change
I believe what I feel because I choose the moment awake

But only in the reveal I know the truth I'm hoping to change
