

# Stay Up

Dean Brody

Getting home kinda late  
Dinner plate in the microwave  
Another one of those days  
Seems it's always this way  
I know what you said  
You might already be in bed  
Well hang on sleepy head  
You ain't closed your eyes yet

There's a star-filled sky  
And the house is all quiet  
It's a lovely night  
It got colder outside  
I already lit the fire  
And I chilled the wine  
In the morning time  
We got nowhere to be  
So come down and stay up with me

Remember how we used to hop  
Downtown bars until last call  
Then we'd stay up and talk  
About nothing at all  
Well, let me grab my guitar  
And there's a blanket in the yard  
And if you drift off to sleep  
Honey, that's okay by me

'Cause there's a star-filled sky  
And the house is all quiet  
It's a lovely night  
It got colder outside  
I already lit the fire  
And I chilled the wine  
In the morning time  
We got nowhere to be  
So come down and stay up with me

Why do the best parts in life  
All seem to happen at night  
Yeah...

'Cause there's a star-filled sky  
And the house is all quiet  
It's a lovely night  
It got colder outside  
I already lit the fire  
And I chilled the wine  
In the morning time  
We got nowhere to be  
So come down and stay up with me  
Come down and stay up with me
