

## Summer Skin

Death Cab for Cutie

Squeaky swings and tall grass  
The longest shadows ever cast  
The water's warm and children swim  
And we frolicked about in our summer skin

I don't recall a single care  
Just greenery and humid air  
Then Labor day came and went  
And we shed what was left of our summer skin

On the night you left I came over  
And we peeled the freckles from our shoulders  
Our brand new coats so flushed and pink  
And I knew your heart I couldn't win  
Cause the seasons change was a conduit  
And we left our love in our summer skin
