

Sagittarius A*

Declan McKenna

Heaven knows you get so miserable, you have to go
Summertime in Cannes and Christmas Day in Borneo
So, you tell your mother, your friends and your family
"I'm gonna travel away to the Andes
Like everybody wants to see them"

You don't have to be sad about it, Mother Nature
And don't let the boys try to doubt it and spoil our fun
'Cause your reaction's all that they want
So just like you said to me once, have a day off

Everybody gets so tired of hearing what you said
When you think your money's gonna stop you getting wet
So Noah, you best start building
You better have ten thousand children
Because everybody wants to be one

You don't have to be running errands for anyone
In pieces, they left no room for me, I'm no one
I'm Sagittarius, I'm A star
So wouldn't you take the day off, Mother Nature?

Wake me up when it's over
Wake me up when it's over
Wake me up when it's over
Wake me up when it's over

Because you feel it pouring and you must run
You will drop your bags and your trust fund
Because the life you lead's so fucking alien

Lord, tell me where did you get that strange idea from?
In pieces, they left no room for me, I'm no one
I'm Sagittarius, I'm A star
So wouldn't you take the day off, Mother Nature?

Woah
