

Love Is Everything

Deee-Lite

Love is everything
Love love love...
I woke in the middle of the night
Just to see how you look when you're sleeping
I don't need a conversation
I just want to feel your vibration
I know your dreaming
And I hope it's about me
Real...
Sometimes you talk too much
No words only melodies
And there's nothing else to say
Nothing else to say
The words just get in the way
I've got to find our melody
Bring it back to me
Bring it back to me
Cause I know that you can feel it when it's real
There's a smile on your face
And it reminds me
How much I like my place
Right next to you
Real...
Follow your dreams
No matter how far they seem
Searching for the reason
The mystery
We can only dream
We can only dream
