

Caught in the Moment

Default

I was waiting for you- just don't think I ever knew
I was out there all alone
Now every breath I breathe for you
If you fall know you can just reach out and take my hand
Give to me the weight of your whole world
I'll carry it for you

Somethings just have to stop
Don't ever say it's your fault

Chorus:

My son, it's not what I wanted
I got tired of falling
This road that I'm riding- it will lead me back to you
Time I thought that was stolen
I got caught in a moment
The moment brought me you

I didn't want you to see what was never meant to be
These old mistakes I can't erase won't come between you and me
I know I'm sometimes hard to find
I'm never leaving you behind
We may be miles away but you should know you're always on my mind

Somethings just have to stop
Don't ever say it's your fault

Chorus

That moment brought me laughter in a storm
A love that can't be torn
And it all started with you
And I see you're the reason I'm here
The reason's so clear
The moment of truth-
This moment brought me you

I got caught in a moment
That moment brought me you
That moment brought me you

Chorus
