

Visions of the Future II

Demon

Nazis on the march again
The left against the reich
Greed has left its legacy
The Gulf has got no light
Will you tell me who killed Kennedy
Even though we always knew
You lived the lie for all those years
Now what about the truth

Speak to me
I need a shelter from this crazy scene
I need to find peace and sanity
In this world

Cities made of mirrors
They're reflecting all our lives
Streets are plagued by zombies
Shaved head, no brain, mad eyes
Ageing politicians driving
Closer to the kerb
Power crazed evangelists
Making fortunes from the Word

Speak to me
I need a shelter from this crazy scene
I need to find peace and sanity

Machines to take us everywhere
From the future to the past
We can all be part of our own destiny
And if you wanna stay a while
You can see what we've become
Everything has changed
And one day you'll be there
Visions of love, visions of life,
Visions of something on the otherside

Assembly lines of human beings all systematically cloned
It wasn't long ago they called it fantasy
Suspended animation sees the return of the living dead
But you might not wake up where you dreamed you'd be
Visions of love, visions of life,
Visions of something from the otherside.

I wanted to run
I wanted to hide
Something just seemed to take over my mind
I couldn't feel what was happening to me
Everything just getting out of control

When the light came on I saw
Visions of the future
In the night I thought I heard
Voices speaking to me
When the light came on I saw
Visions of the future
In the night I thought I heard

Voices speaking to me
When the light came on I saw
Visions of the future
In the night I thought I heard
Voices speaking to me
