

Let us lie

Destination Anywhere

And now we lie together
Outside the world is passing by
I know I can't feel better
It's cause of you right by my side
And nothing else that matters
Now I begin to slip away
Can't wait for another day right by your side
You dream away I'm still awake
The candle flame keeps me today
It makes you look like you are not from here
A delicate creature from another kind of nature
And I wish that moment wouldn't disappear

So let us lie
Like the morning never comes
I'm by your side
This struck of luck will never end
Until I die I want you right by my side
To keep you when I'm away onto my mind

You're all I need to see today
Cause you can make me feel the way
Nothing ever hurts us anyway
I see that you come to no harm
Calm down lie into my arm
And sleep the world we know and dread away

So let us lie
Like the morning never comes
I'm by your side
This struck of luck will never end
Until I die I want you right by my side
To keep you when I'm away onto my mind
