

## Night Skies

Destine

When the spell is finally broken  
And the summer's dead and gone  
I'll say are you still with me  
'Cause it feels like I've been sleeping  
Or been holding back for years  
I say are you still with me  
'Cause it's all I need here

And time is roughly ticking  
Light is slowly chasing you  
With the least thing that I do  
As I watch the city sleeping  
Night skies lead me back to you  
It's the least that I can do

Suddenly there's not much left  
In talking 'bout tomorrow  
All we live is history  
When something like my daily bread  
Turned out to be mistakes we had  
I'll say are you still with me  
And it's all I need here  
Sometimes I can't hide from the fear  
Of losing you here

And time is roughly ticking  
Light is slowly chasing you  
With the least thing that I do  
As I watch the city sleeping  
Night skies lead me back to you  
It's the least that I can do

What does it take to forget  
A road with no end  
Save it for another day  
It's true: I won't be far from you  
Stray alone in the dark  
It won't get me far  
Save it for another day, it's true

And time is roughly ticking  
Light is slowly chasing you  
With the least thing that I do  
As I watch the city sleeping  
Night skies lead me back to you  
It's the least that I can do
