

# Biological Warfare

Dethklok

You're dying  
Every single moment passing  
Decaying  
Spend your life ignoring it  
Suffocation  
Slowly choking takes a lifetime  
Replication  
Before your rotting innards quit

Years passing and you're left behind  
Better find a faceless soul to blind  
Punish them all for your lot in life  
Set the trap and sharpen the knife

It's biological warfare  
Oh no

Locked in targeted  
Tricked me into your submission  
Flipped the tables turned it over  
Changed it into my remission  
Used my brain against itself  
Eat itself away  
Biological ticking time bomb  
Birth my own disgrace

I'd rather die  
Be the last of my kind  
I gotta pull out  
I'm saving my life

You built a bomb  
Made of flesh and piss  
Don't get what you want  
There's blood on your list

It's biological warfare  
You've awakened the psycho  
It's the DETH of your mind

It's biological warfare  
You're collecting your losings  
The mistake of your life

It's biological warfare  
And you're stuck with the devil's child

It's biological warfare  
Draw the curtains and kiss your ass  
Goodbye

Like an insect  
You're entangled  
You're the one that wanted this  
DETHLY cycle

You live like a ghost now

Your voiced silenced  
Haunting your domain

Leave this nightmare now

Sword sheathed it's  
The time for action  
No witness yet the raven sees you  
Keep moving of goliath meets you  
The evil burns and your ending greets you

The behemoth  
Demon savage  
Shadows growing  
Wolven magic

Rabid gorgon  
Fled the cage  
The unholy  
Now enraged

She's gonna hunt you down  
That's right  
Keep going now  
She almost gotcha  
Now run
