

Step Aside

Devour The Day

You have no idea how hard I will laugh
when the world chews you up then spits you out
You're without a doubt mirrors and smoke
You're the worst fucking joke I've ever heard

Out of sight
Out of mind
I will make you disappear
Step aside
You parasite
You are the reason no one cares

It's so clear to me you have puppet strings
And you hang on the words of who has control
You do what you've told
You lay on your back and beg for the scraps they feed to you

Out of sight
Out of mind
I will make you disappear
Step aside
You parasite
You are the reason no one cares

Step aside
Parasite
Step aside
Parasite
Parasite

Out of sight
Out of mind
I will make you disappear
Step aside
You parasite
You are the reason no one cares

You parasite
You parasite
