

# Angel

## Digital Daggers

Candle light, blood is cold  
Ticking clocks, sun-gold  
I can hear them turning round as I lay here on the ground  
Racing heart, poison woods  
Shattered dreams, nowhere to turn  
I can feel the water fall from my eyes and down the walls  
I don't know if anyone can hear me...

I've been looking for an angel, angel  
Been looking for an angel, angel  
To come save me from this hell  
To come save me from myself  
I've been looking for an angel,  
Been looking for an angel, angel  
To kill the aching in my heart  
Don't leave me lost here in the dark

City streets, thundering  
Fuel the fire, and feed the pain  
I just want to feel alive, light me up and burn the sky  
Wandering, needing fire  
From the ocean to the stars  
Cigarettes and gasoline, only God knows where I've been  
I don't know if anyone can hear me...

I've been looking for an angel, angel  
Been looking for an angel, angel  
To come save me from this hell  
To come save me from myself  
I've been looking for an angel,  
Been looking for an angel, angel  
To kill the aching in my heart  
Don't leave me lost here in the dark

Won't you tell me where you are  
Won't you tell me where you are  
Won't you tell me where you are  
Don't leave me waiting for too long  
Won't you tell me where you are  
Won't you tell me where you are  
Don't leave me waiting for too long  
Don't leave me waiting for too long

I've been looking for an angel, angel  
Been looking for an angel, angel  
To come save me from this hell...

I've been looking for an angel,  
Been looking for an angel, angel  
To kill the aching in my heart  
Don't leave me lost here in the dark

Won't you tell me where you are,  
Won't you tell me where you are,  
Don't leave me waiting for too long

I've been looking for an angel, angel

Been looking for an angel, angel  
To come save me from this hell...
