

Do Me Damage

Digital Daggers

We made a cut without precision
And we stitched it up the best two children could
But we were ruled by indecision
And we pushed and pulled more than two people should

When you want me I am here
When you change your mind again and disappear
When it's settled and all is clear
Oh, you change your mind again and want me near

So do me damage or do me right
We could be the ones who see the other side
So do me damage or do me right
We could be the only lovers left alive

We made a pact and sad forever
Then we blurred the lines so much, we lost our way
We were broken and stuck together (stuck together)
Then we tried to find the reasons we should stay

When you want me I am here
Then you change your mind again and disappear

So do me damage or do me right
We could be the ones who see the other side
So do me damage or do me right
We could be the only lovers left alive

When it's settled and all is clear
When you want me I am near
When you say that you're mine I come running everytime

So do me damage or do me right (do me right)
We could be the ones who see the other side (other side)
So do me damage or do me right (do me right)
We could be the only lovers left alive
(So do me damage, do me right)
We could be the only lovers left alive
We could be the only lovers left alive
