

Night Music

Dio

Face it - it's another day
And it's gonna be the same tomorrow
The sun's gonna go away
So let it shine on - shine on

When you move to the rhythm of shadows
You can hide from the heat of the sun
If you dance to the beat of the darkness
You burn before the fire's begun

Then comes the night
You come alive

(With) night music
It keeps spinning around my head
Night music
It's all the things you never said
And anywhere you are
There's night music

Open up your arms
Let the night time in
Say the word and it begins

In the night you're the song and the singer
You can choose what the band's gonna play
Write the words under cover of moonlight
Make some magic with the things that you say
Together we can kill the day

Night music
It keeps spinning 'round my head
Night music
All the things that you never said

Here comes the night
You will survive
Dancing in the moonlight
Makes you feel alive

Open your arms
Let it begin
Open up the magic
Let the night time in
