

Then Came You

Dionne Warwick

Ever since I met you
Seems I can't forget you
The thought of you keeps running through
The back of my mind

Every time I'm near you
I get that urge to feel you
Just touching you and loving you
Makes everything right

(Tell me how you feel baby)
I never knew love before
Then came you, then came you
I never knew love before
Then came you, then came you
You

Now that I have found you
How did I live without you
It's plain to see you're all I need
To satisfy me

I'm so darned proud of you
I wanna sing about you
For all you know you made love grow
By touching my hand

Oh, I never knew love before
Then came you, then came you
I never knew love before
Then came you, then came you
Yeah, then came you

Oh, I never knew love before
Then came you, then came you
I never knew love before
Then came you, then came you

Oh, I never knew love before
Then came you, then came you
I never knew love before
Then came you, then came you

You know that I never knew love before
Then came you, then came you
I never knew love before
Then came you, then came you

Oh, I never knew love before
Then came you, then came you
I never knew love before
Then came you, then came you
