

Given You Everything

Dirty Vegas

You make it look so easy to pretend
That all we ever was, was only friends
You twisted every word I ever said
You made me say the things that I might regret

When I've given you everything that I should
Given you everything that I could

Make it look so easy to forget
Loving you is a journey that never ends
An' I've given you everything that I should
Given you everything that I could, that I should

So you want my love and have it your own way
So come on, come on, come on now
No matter how I try, I just can't walk away

But I'm giving you everything that I should
Given you everything that I could
When I'm giving everything that I should
Given you everything that I could, that I could, that I could

So could I let you down, was I not your sound
So could I let you down, was I not your sound

So you want my love and have it your own way
So come on, come on, come on now
And no matter how I try, I just cant walk away

An' I'm giving you everything that I should
Given you everything that I could
An' I'm giving you everything that I should
Given you everything that I could, that I could, that I could
