

Light It Up

DJ Antoine

There's something in the air
It's making me so loco
Feel it from my cabeza down to my toes
I'm filled with that emotion
It's stronger than the ocean
Before I even know it I'm letting go

Forget all your problems
You don't have to solve them
You just got to live and love
So, let's come together
A moment forever
We'll shine like the stars above

Light it up
In the heat of the night
There's a fire in your eyes, I can see it
Light it up
Watch the temperature rise
Raise your hands to the sky if you feel it

I feel it getting hotter
Sweat dripping like a sauna
Lose your clothes if you wanna, yeah, it's alright
'Cause it's a celebration
Whatever your persuasion
We got no inhibitions, nobody minds

Forget all your problems
You don't have to solve them
You just got to live and love
So, let's come together
A moment forever
We'll shine like the stars above

Light up
In the heat of the night
There's a fire in your eyes, I can see it
Light it up (Light it up)
Watch the temperature rise
Raise your hands to the sky if you feel it (If you feel it)

Light it up
In the heat of the night
There's a fire in your eyes, I can see it
Light it up (Light it up)
Watch the temperature rise
Raise your hands to the sky if you feel it (If you feel it)
