

Shut Up & Kiss Me

DJ Sammy

The light's 'bout to fall
And everybody is clearing out
I know you're nervous and all
So let me take away all your doubts

I'd rather let our lips just do the talking
That's how we gon' get it started
Let your body lead the way
There ain't nothing left to say

Cause girl you're talking too much
Why don't you shut up and kiss me
Because I know what you want
So baby shut up and kiss me

Girl you're talking too much
Why don't you shut up and kiss me
Because I know what you want
So baby shut up and kiss me, kiss me, kiss me

The light's 'bout to fall
And everybody is clearing out
I know you're nervous and all
So let me take away all your doubts

I'd rather let our lips just do the talking
That's how we gon' get it started
Let your body lead the way
There ain't nothing left to say

Cause girl you're talking too much
Why don't you shut up and kiss me
Because I know what you want
Why don't you shut up
Why don't you shut up
Why don't you shut up...

Girl you're talking too much
Why don't you shut up and kiss me
Because I know what you want
So baby shut up and kiss me

Girl you're talking too much
Why don't you shut up and kiss me
Because I know what you want
So baby shut up and kiss me, kiss me, kiss me
