I've had battles with the devil And it's left a scar you're two Why do I forget my troubles Whenever I'm with you

Like an angel
Are you an angel
You have saved my heart
And you play your part
Like an angel to me

Yes I met you on my darkest day When my world turned cold as ice You lit my cigarette And you took me away It felt like paradise

Like an angel
A real angel
Drown me in your light
Take me through the night
You're an angel
I have fallen
From the dark above
Into the arms of love
You're an angel to me
