

# Steeple

Down

Savior, poison, silver  
Mankind makes it so  
Hot at the touch  
Burn into the sun  
Skepticism, guilty  
Show me back in, perched in  
Cracked windows open  
Still on the sky  
Flying device  
Crumble the sight  
Falls down

Pray guilty forever it hurts  
The answer to your prayers  
Pray guilty upside down it hurts  
It's crashing, I can't fix it  
It's crashing in the ether  
And the steeple will fall

Clean fleece, clean sheets  
Blood spilled all over the ground  
Part it, the storm  
Eclipse the sun, inside so much  
Hate it but embrace fate's way  
Down singing, rad relegation  
Driving the shore  
Dance while they want under the sun  
Frame one now

Pray guilty forever it hurts  
The answer to your prayers  
Pray guilty upside down it hurts  
It's crashing, I can't fix it  
It's crashing in the ether  
And the steeple will fall

I've been searching high and low  
High and low  
For you and I  
I say the steeple will fall  
And the people will crawl

The steeple will fall  
The steeple will fall  
The steeple will fall  
The steeple will fall

The steeple will fall  
The steeple will fall  
The steeple will fall
