

## The Big Sleep

Dr. Acula

Brace yourself for the fall. Understanding and over-  
thinking has saved many  
from a life of false belief, my being one of them. I've  
learned to accept what  
happens in the end and sometimes you're better off if you  
choose to neglect.  
There is a time and place for everything and I believe I  
never made it there in  
time for fucking anything. Don't try to crack me with  
your therapeutic nonsense  
and doing has turned me into what I have become. Because  
if I get my way and  
have my way with you, I will destroy your every thought  
of what is right in  
life. I dare you to get close to me, I dare you to get  
close to me. I've always  
been a firm believer in this life is short nothing  
happens on the day that it  
ends so I'm here to clear the doubt in your head. What's  
done is done and when  
you're dead, you're fucking dead. I promise you, I  
promise you it's gonna be a  
bad one. I promise you, I promise you, its gonna be a bad  
one. So brace  
yourself for the fall...I promise you its gonna be a bad  
one.
