

Forged Into Metal

DragonHeart

Through the deepest forests, beneath the stars we ride
The moon is glowing red like the warrior's blood
There's a prophecy, that tonight many men will die
The fire will burn forever in our hearts

(Bridge)

Our destinies are calling us now
We are ready to take their lives
We go to the battle, we ride with the Gods
We are strong and we are not afraid to die

(Chorus)

Together we fight, forever we'll live
Our Saints are our strength
'Cause we are forged in metal

Prominent leaders, cast your swords in the wind
A sign of war ready for death
The lightning's flash, the thunder's roar
Will petrify the weak
We'll show no mercy, we'll kill them all

(Bridge)

(Chorus) (2 Times)

(Solo)
