Forged Into Metal

DragonHeart

Through the deepest forests, beneath the stars we ride The moon is glowing red like the warrior's blood There's a prophecy, that tonight many men will die The fire will burn forever in our hearts

(Bridge) Our destinies are calling us now We are ready to take their lives We go to the battle, we ride with the Gods We are strong and we are not afraid to die

(Chorus)
Together we fight, forever we'll live
Our Saints are our strength
'Cause we are forged in metal

Prominent leaders, cast your swords in the wind A sign of war ready for death The lightning's flash, the thunder's roar Will petrify the weak We'll show no mercy, we'll kill them all

(Bridge) (Chorus) (2 Times) (Solo) (Chorus)
