

December

Dream On, Dreamer

I know that you're scared when you're lonely
But I've found that I'm lost whenever we're hurting

I know that you and me, we get lonely
But it's something that I'd like to keep holding
There's a new dream under your bed
Don't let it sleep, don't ever let it rest
And if you're drowning on your own
Then it could be the end

I know you would hold me too

Don't you remember
The way you made me feel, December?
I can't change the weather
And it was always raining where you were

We could be anything
We could be the end of a bad dream
Falling, we're falling down
As long as you're with me
Hold on, just don't wake me up
We're falling, we're falling down

Don't you remember
The way you made me feel, December?
I can't change the weather
And it was always raining where you were
Return to sender
I've already said all that I can say
Don't you remember?
My heart has taken all that it can take

Hold me up, never stop this feeling
This glow in the dark was meant for
Meant for you

Don't you remember
The way you made me feel, December?
I can't change the weather
And it was always raining
Don't you remember
The way you made me feel, December?
I can't change the weather
And it was always raining where you were
Return to sender
I've already said all that I can say
Don't you remember?
My heart has taken all that it can take
