

We Gotta Go

E-Type

We gotta go
We've got nothing to lose now
Time has come for us to get out
We gotta go
If we're going down, well
Let's go down in flames

Gotta go now

Gimme something,
I can't stand waiting
Don't wanna live you life in a rut, so get in
Coming on strong like a force of nature
Why can't you let it go away....

I'm ready to launch
I've got my fingers on the trigger
You can't keep me down
Cause i'm only getting bigger
I'm ready to go now
I'm ready to leave now
I'm ready to go away.

Don't point your finger,
you can't take away my pride
Cause I'm the wave
that will turn the tide
I'm the scream you will hear
I'm the one you will fear
You can only watch me go away
