

# The Rush

Earth, Wind & Fire

I could be out in the streets of New York City  
But it could be anywhere  
When the heat beneath my feet feels like the sun is rising  
It's almost like you're there  
Need that state in my mind all the time  
Just like I breath to survive  
And I'm fine til the chile strikes and it's quitting time  
The only thing that could make life better  
Is if that knocking on my door right now is you  
Girl I hope that it's you

'Cause we'll lay awake from dusk til dawn  
When you're next to me the passion's never gone  
I just can't fall asleep, my heart is racin'  
Girl, when I think of you, you know the rush is on  
(You know the rush is on)

Everyday's a fever race into our future  
This we know it's true  
Need that state in our minds all the time  
Just like we breath to survive  
We'll be fine til the chime strikes and it's quitting time  
The only thing that could make life better  
Is if that knocking on my door right now is you  
Girl, I hope that it's you

'Cause we'll lay awake from dusk til dawn  
When you're next to me the passion's never gone  
I just can't fall asleep, my heart is racin'  
Girl, when I think of you, you know the rush is on  
(You know the rush is on)

'Cause we'll lay awake from dusk til dawn  
When you're next to me the passion's never gone  
I just can't fall asleep, my heart is racin'  
Girl, when I think of you, you know the rush is on  
(You know the rush is on)

Oh the rush, is on, it's on and on (yes, the rush is on) (2x)
